Pivoting attachment for beam

/ Use

Attached to the structure of a pylon, the attachment is used in conjunction with the insulated beam. This allows it to be articulated in a vertical position and rotated to a horizontal position. When the attachment is placed on angles larger than 100 mm (3.9"), the fixing rods must be equipped with hooks and washers

/ Areas of activity

Electrical distribution

Transport

/ Technical specifications

- **Product type** : Positioning devices for working at height
- **Positioning devices for working at height** : Seat
- **Operating voltage (V)** : HTB (> 50 000 V)
- **Support material** : Metal
- **Maximum working load (MWL)** : 1000 daN

Product reference	Weight (kg)	Dimensions (mm)
LW02-13-CRAP	1,3	100x100x134
LW02-13-CONS	8,7	240x235x240
LW02-13-PLAT	4,4	355x245x30
