Multi head link stick

/ Standards

- ASTM F711
- IEC 60855-1

/ Use

The multi head link stick is used as an intermediate insulating device that allows the operators to apply tensile forces to a workpiece or a conductor. The tool can be applied in different situations, depending on the choice of head chosen.

/ Areas of activity

 Electrical distribution

/ Technical specifications

- Product type : Tirant
- Weight (kg) : 10,0
- Pulling undwinding devices : Pulling devices
- Operating voltage (V) : HTA
- Ø of tube(s) : 32 mm
- Isolating length : 1,1 m
- Total length : 1,5 m
