## / LW12-11

Insulated measuring rod

## / Use

The insulated measuring rod is used to measure distances.  
The flexibility of the rod allows curvilinear lengths to be measured.  
Can be extended with the LW12-11-RAL.  
Can be used with universal stick, clampstick or handheld.

## / Areas of activity

Electrical distribution

Transport

| Product reference | Weight (Kg) | Insulating length | Overall length, elements folded (mm) | Rod Ø (mm) |
|-------------------|-------------|-------------------|--------------------------------------|------------|
| LW12-11           | 0,6         | 145               | 155                                  | 10         |
| LW12-11-RAL       | 0,9         | 90                | 104                                  | 15         |
