Support rope (equipped with two tensioners)

/ Use

The support rope is used to triangulate the service rope. It allows the triangulation to be varied by changing the position of the tensioners.

Three-strand synthetic fibre rope with a diameter of between 12 and 14 mm (0,47" to 0,55"). Equipped with two tensioners and with a spliced eye at one end.

Length: 20 m / 65' 7".

/ Technical specifications

- Product type : Rope
- Weight (kg) : 110 g/m
- CMU (daN) : Glissement tendeur : 50daN
