/ MS7S
1000V Fully insulated adjustable spanner

See online technical sheet

/ Standards

- **Standards :** NF EN 60900, IEC 60900, NF ISO 6787

/ Use

A fixed, enclosed head, within which the movable jaw moves.
To minimise the risk of a short circuit.

/ Advantages

- The jaws open and close using a separate knob, making it easier to operate while wearing gloves.
- Guaranteed optimal capacity up to 34 mm
- Fully insulated adjustable wrench with an insulated movable jaw.

Document not contractually binding, errors and omissions excepted

/ Technical specifications

- **Clamping key kind :** Fully isolated
- **Wheel :** Isolated
- **Isolated head**
