

**/ RL1-36-13X150**  
1000V Insulated Rotoline nut driver

**/ Standards**

EN 60900 / IEC 60900 / ISO 691

**/ Use**

Products intended for screwing and unscrewing the most inaccessible nuts, they allow the passage of nuts with a protruding threaded rod.

**/ Technical specifications**

Perfectly smooth rear hinge for comfort in intensive use.

Choice between 2 types of handles:

RL1 = Ergonomic handle for comfort and powerful tightening.

RL2 = RL1 + in addition the end of the handle is rotatable for help in approach tightening, and to limit wear or damage due to friction with the insulating glove.

RL3 = RL1+RL2 + in addition a blocking system of the rotating handle end allows to obtain automatically a monobloc handle for an optimal transmission of the tightening torque.
