Earthing and short-circuiting equipment for bare LV overhead lines

/ Standards

- CEI 61230

/ Use

Device for short-circuiting and, if necessary, earthing bare LV overhead networks.

/ Advantages

- Automatic spring clamp, no manual tightening required
- Fast and easy to use

/ Areas of activity

-  Electrical distribution
-  Civil security
-  Transport

/ Technical specifications

- Product kind : Dispositif
- Clamp material : Aluminium
- Clamp tightening (mm) : Ø3 à 18
- Nozzle type : Ring (AN)
- Conductor type : Round
- Operating voltage (V) : BT (50 V to 1000 V)
- Field of use (environment) :
- Short-circuit intensity kA/Is : 4
- Phase câble
- Floor cable
- Cross-section (mm²) : 16
- Floor cable lenght (m) : 0.7
