Mass braids

See online
technical sheet

/ Use

Grounding braids are used to make equipotential connections between metal masses such as machines, to protect people and equipment from dangerous voltages.

/ Technical specifications

- **Product specificity** : Permanent
- **Product kind** : Accessories
- **Field of use (environment)** :
- **Station office** : After electric meter
- **After electric meter** : Industria
- **Short-circuit intensity kA/0.5s** : 63
- **Short-circuit intensity kA/1s** : 30 à 40
- **Composition** : Tresse de masse de section 185mm² et longueur entre-axes 300mm
- **Accessory materials** : Copper
- **Weight (kg)** : 0,72
