## / TM94N Digital insulation tester

### / Standards

IEC 61010 300 V CAT III / IEC 61557

### / Use

Particularly innovative and user-friendly, the TM94 insulation tester is ideal for testing electrical installations and equipment.

### / Technical specifications

- Insulation : up to  $2G\Omega$  at 250V, 500V and 1,000V DC
- Voltage indication before insulation measurement : 0 to 600V AC/DC (blocking if  $U > 25V$ )
- Continuity :  $-20\Omega$  to  $+20\Omega$  (audible beep and compensation of leads)
- Resistance : 0 to  $400k\Omega$
- Giant 4,000-count display + bargraph (simultaneous reading of the measurement and analogue variance)
- Backlit rear display
- Programming of alarms
- Timer function (0 to 15 min)
- Back stand for use on a table or on the ground
- Measurements in compliance with IEC 61557, NF C 15-100, VDE 0413

Supplied with : 1 "hands-free" carrying case, 1 pair of red and black leads 1.5 m, 1 red alligator clip, 1 black test probe, 6 x LR6 batteries and operating manual.
