## / TSA Silicone tube

## / Use

The silicone tube is used to facilitate the sliding of a cable preparation tool over the non-peelable semiconductor of a cable. It helps to improve the stripping quality of this layer.

We recommend using it with all ALROC non-peelable semiconductor tools without bearings:

- ASC tools
- BSC tools
- ASR tools
- LHS tools

Grease-type substance formulated with selected polydimethylsiloxane fluids combined with inert amorphous silica fillers.

Shelf life of 18 months from the date of manufacture, as indicated by the batch number, when the product is stored in its original, unopened packaging at a temperature equal to or below 38°C.

## / Technical specifications

- Specific tools : Cable tools
- Cable tools : Cable tools
- For network cables : medium voltage
- Weight (g) : 168
- Length (mm) : 195
- Width (mm) : 62
- Height (mm) : 35
- Tools king : Specific tools
