

/ LW08-02

Support rope (equipped with two tensioners)

/ Use

The support rope is used to triangulate the service rope. It allows the triangulation to be varied by changing the position of the tensioners.

Three-strand synthetic fibre rope with a diameter of between 12 and 14 mm (0,47" to 0,55"). Equipped with two tensioners and with a spliced eye at one end. Length: 20 m / 65' 7".
