## / MC4CE-XL

1000V Universal insulating pliers

### / Standards

EN 60900 / IEC 60900 / FT BT 402

### / Use

These pliers are particularly suitable for low voltage live working in confined spaces where the risk of a short-circuit can have serious consequences for people and installations.

### / Technical specifications

Bi-material handle allowing a good grip and ease of handling, without risk of damage to the gloves.  
Arm profile allowing the transmission of important effort with ease = control of the gesture.  
Hanging system, ideal for work at height.  
Ergonomic use with insulating gloves.  
Fiberglass reinforced composite material = light and robust.

### / Table legend

tools / MC4CE - L/XL  / penta-table-legend

## Advantages

- Insulating tool = minimises the risk of short circuits, no conductive material is accessible.
- Ceramic cutters (compressed to over 200T giving them extreme hardness properties).
- Head gripping surface with soft ribbing (to not damage the cables).
- 2 handle sizes available:
  - L : compact - standard pliers length
  - XL : + 20 mm = Force transmission gain ~ +10%.
