Wooden swingback stepladder

/ Standards (old)

EN 131

/ Use (old)

The top shelf of this ladder may not be considered to be a step.

/ Technical specifications (old)

The uprights are made of top-quality light Canadian Western Hemlock, with wraparound anti-slip pads.
The steps are made of beech, with a comfortable 250 mm distance.
The ladder is impregnated with water-repellent and fungicide.
Safe working load : 150 kg max.

Advantages (old)

Wood is a non-conducting material that is appreciated for its electrical insulation. The ladder is assembled mechanically, allowing all possible repairs in the factory. The ladder has 80 mm steps for more comfort.
