/ LW14-11 Test bench

/ Use

The test bench is used to check the dielectric characteristics of insulating tools, during their periodic inspection. Connected to a high voltage source, it allows up to 4 tools to be subjected simultaneously to the desired voltage.

This test bench allows visual control of the test during its execution.

Quick wiring system every 300 mm (12").

Included in the bench 14 in total.

Made of reinforced fibreglass tube and plastic for the insulating parts. Pole support, connection device and metal wheels. Wiring device to accommodate 4 poles.

Spacing of brackets for applying tension: 300 mm (1').

Standard length = 4.5 m / 14 ft. 9 in.

Maximum length on request = 6.5 m / 21 ft. 3 in.

Accessory : Quick wiring system ref : LW14-11-CR

/ Areas of activity

Electrical distribution

Transport

/ Technical specifications

- **Areas of activity** : Electrical distribution, Transport
- **Weight (Kg)** : 150
- **Dimensions (mm)** : Standard : 4700x1950x900mm
