### / Standards

EN 60900 / IEC 60900

### / Use

The special profile of the spanner creates a ratchet effect while tightening (or loosening).

### / Technical specifications

The ratchet system is set off after every quarter turn, so there is no need to disengage the spanner.

## Advantages

- This system offers the benefit of being faster and more effective in use as compared to a conventional tool.
- This principle also allows easy use in tight spaces.
