technical sheet

/ Standards

EN 567 / EN 12841-B

/ Use

Left or right-hand light alloy ascender handle with ergonomic rubber grip for climbing ropes.
To be used with rope with a diameter between 8 to 13 mm.

/ Technical specifications

Ascender handle with aluminium body, blocking cam, opening lever, ergonomic rubber grip and attachment holes.

Maximum load : 100 kg

Advantages

- Ergonomic grip, with support for index finger, for improved effectiveness when pulling during climbing
- Cam opening lever usable with one hand, patented system for unlocking the cam, with just one downwards movement necessary
- New steel cam, manufactured with technology that implements the resistance to wear and tear. Equipped with a set of teeth that protects the wear of the rope, but it is equally effective in blocking and ascending the rope. It also has three slots to prevent the accumulation of mud and reduce the effort needed to slide the device up the rope under any condition (muddy rope, frozen etc.)
- Two attachment holes for various possible uses, anti-inversion cam system, secondary hole for connecting a quick link for an etrier.
