Manual lever chain hoist double click system

/ Use

This hoist is particularly suitable for lifting, handling, pulling (hauling) and mechanical tensioning. Its double click system ensures an optimal level of safety. It is a high powered manual hoist suitable for all applications.

/ Technical specifications

- Rubber handle.
- Hook free rotation 360°.
- Anti-corrosion chain protection.
- The hoist disengages the chain when iddle (without load).
- 6 ton hoists equipped with a shell block sheave lifting hook.

Advantages

- Compact and powerful hoist.
- Robust alloy steel construction.
- Freewheel system under no load for quickly approaching the hook to the load.
- Automatic closing of the brake when under load.
- Double click system to secure the load.
