Engineer's hammer with carbon shaft

/ Standards

E 71-010 / E 71-014

/ Technical specifications

Unbreakable : Fibreglass heart : exceptional lengthwise design = shaft resistance 10 times superior to wooden shaft.

Anti vibration polypropylene combined with the transverse flexibility of fibreglass = absorbs 10 times more vibration than a classical shaft

Comfort : Webbed, consistent and flexible elastomer = comfortable handling (no lump) = efficient grip

Precision : Major adding of the ultra-rigid carbon fibre : allows the striking precision without avoiding the absorption of vibrations.

The striking is sharp, easy and precise.

Advantages

The Carbon 4-material shaft has an ergonomic design and prevents from tiredness and dangers due to intensive use of the tool.
