/ CROSMIHT MV hook ammeter

/ Use

The CROSMIHT hook ammeter measures current flow on overhead lines up to 52 kV.

/ Technical specifications

Measurement scale :

From 0 to 2000 A by self-calibration: 0-199.9 A / 199.9-1999 A

"HOLD" measurement: provides the max. current measurement

Accuracy : +/- 3 %

Capacity : cables and conductors up to Ø 48 mm

Power supply : 9V battery with 50-hour battery life

Automatically switches off after 10 min

Climate class N : -18°C to +50°C.

Advantages

- Quick remote handling of the conductor without having to open a clamp.
- Readout on a liquid crystal display, either instantly or in "HOLD" mode for remote measurements using a long stick.
