/ DESA2 STD

Portable anchoring device for insulated ladders without pole support

/ Standards

EN 795 : 2012 - Class B Certified with Audinnov insulated ladders

/ Use

This device allows, at the same time, to secure the ladder to its support and to create a safety line from the ground.

/ Technical specifications

2 stainless steel parts to be connected together, 2 mm thick, with adjustable slide for fixation between the 2 upper rungs of the ladder.

Supplied with :

- a lanyard 1,30 m
- screws and bolts
- installation and operating instructions
- a transport bag

Advantages

Removable device, easy to install.

3 main functions :

- Secure the ladder to the pole
- Lateral stabilisation of the ladder
- Installation of an anchoring point to connect a lifeline
