/ Normas

- CEI 61230

/ Ventajas

- Automatic spring clamp, no manual tightening required
- Installation of a very high ground malt from the ground level

/ Areas de actividad

-  Distribución de electricidad
-  Protección civil
-  Transporte

/ Características

- Product kind : Dispositif
- Clamp material : Aluminium
- Clamp tightening (mm) : Ø3 à 18mm
- Conductor type : Round
- Operating voltage (V) : BT (50 V to 1000 V)
- Field of use (environment) : Aerial or transformation station
- In line (aerial) : Isolated
- Way of access : From the floor
- Short-circuit intensity kA/Is : 3

Product reference	Advantages MALT	Weight (kg)
PA3BTENEDIS	Easy to use on all types of terrain without climbing, Low weight constraints, Fast and easy to use, Installation of a very high ground malt from the ground level	24,0
PA3BTN	Automatic spring clamp, no manual tightening required, Installation of a very high ground malt from the ground level	20,0
