/ TLF8

Lever screwdriver with flat blade Ø 8 mm

/ Uso

This tool facilitates the leverage operations required in different configurations (e.g. removing wood panels and meters).

/ Características

Large cross-section blade limits the effect of elasticity when levering.
Flat blade with a 15° angle.
This tool is not an insulated tool.

/ Table legend

Overall length tolerance : ± 5 mm of the nominal value.

Ventajas

- No need to use a conventional screwdriver for leverage operations.
- The handle profile allows good torque transmission.
