/ Normas

EN 60900 / IEC 60900 / FT BT 402

/ Uso

These pliers are particularly suitable for low voltage live working in confined spaces where the risk of a short-circuit can have serious consequences for people and installations.

/ Características

Bi-material handle allowing a good grip and ease of handling, without risk of damage to the gloves.
Arm profile allowing the transmission of important effort with ease = control of the gesture.
Hanging system, ideal for work at height.
Ergonomic use with insulating gloves.
Composite material = lightness.

Ventajas

- Insulating tool = minimises the risk of short circuits, no conductive material is accessible.
- Ceramic cutters (compressed to over 200T giving them extreme hardness properties).
- Head gripping surface with soft ribbing (to not damage the cables).
- 2 handle sizes available:
 - L : compact - standard pliers length
 - XL : + 20 mm = Force transmission gain ~ +10%.
