/ TM94N

Digital insulation tester

/ Standards

IEC 61010 300 V CAT III / IEC 61557

/ Use

Particularly innovative and user-friendly, the TM94 insulation tester is ideal for testing electrical installations and equipment.

/ Technical specifications

- Insulation : up to $2G\Omega$ at 250V, 500V and 1,000V DC
- Voltage indication before insulation measurement : 0 to 600V AC/DC (blocking if $U > 25V$)
- Continuity : -20Ω to $+20\Omega$ (audible beep and compensation of leads)
- Resistance : 0 to $400k\Omega$
- Giant 4,000-count display + bargraph (simultaneous reading of the measurement and analogue variance)
- Backlit rear display
- Programming of alarms
- Timer function (0 to 15 min)
- Back stand for use on a table or on the ground
- Measurements in compliance with IEC 61557, NF C 15-100, VDE 0413

Supplied with : 1 "hands-free" carrying case, 1 pair of red and black leads 1.5 m, 1 red alligator clip, 1 black test probe, 6 x LR6 batteries and operating manual.
